

Supplementary Figure 4: ARA-C Does Not Decrease Nuclear Protein Levels

Western blot analysis with anti-Sp3, anti-YY1, anti-BTF3, and anti-acetyl-Histone H3 antibody confirms no reduction in protein levels for these three transcription factors (Sp3, YY1, and BTF3) nor for Histone H3 in nuclear extracts from A673. Cells were treated for three days with ARA-C at 0.17 or 0.34 μM and compared to control A673 cells.
